ABSTRACT

Information on tuition and mandatory charges for full-time undergraduates at Maryland public four-year institutions since 1977 is presented, along with comparisons with mandatory charges for full-time undergraduates in contiguous states and states belonging to the Southern Regional Education Board (SREB). Tuition and mandatory charges for full-time, undergraduate residents of the state varied at the public four-year colleges and universities but were consistently greater than the national average and the average charges of SREB states. Charges for the University of Maryland system were equal to the national average, higher than the average charges in SREB states, and lower than the charges at the research universities in contiguous states. Average room and board charges at Maryland public institutions in fiscal year 1986 were higher than those in SREB and contiguous states. Information is also provided on tuition and charges for graduate study, professional schools, and community colleges. Progress toward tuition guideline goals that were established by the State Board for Higher Education in 1982 is also evaluated. For each college and category of student, data are presented on tuition charges, and fees for: student activity, athletics, health, student union operations, and other. Enrollment data for the past 10 years at two- and four-year state colleges are included. (SW)

FOREWORD

The State Board for Higher Education has prepared this report on tuition and mandatory charges as a part of its continuing efforts to maintain current data on college costs. This report provides information on tuition and mandatory charges at Maryland institutions since 1977 and includes comparisons with mandatory charges in both the Southern Regional Education Board and contiguous states.

We are grateful for the cooperation and assistance provided by the segments of higher education in Maryland.

Dr. Mary McKeown of the Division of Finance and Facilities had primary responsibility for this report.

Sheldon H. Knorr

Commissioner

EXECUTIVE SUMMARY

This report is an update of the 1982 State Board for Higher Education report on tuition and mandatory charges that was requested by the Joint Chairmen of the Senate Budget and Taxation Committee and the House Appropriations Committee. The report provides information on tuition and mandatory charges at Maryland public institutions since 1977 and compares Maryland's costs to those of other states. Progress on the State Board for Higher Education's Tuition Guidelines is also assessed.

Tuition and mandatory charges for undergraduate residents who attend full-time varied at Maryland's public four-year colleges and universities. Charges were highest at St. Mary's College of Maryland and lowest at the University of Maryland Eastern Shore in FY 1987. When compared to mandatory charges for full-time undergraduate residents in other states, Maryland's mandatory charges at the State universities and colleges and at the community colleges consistently were greater than the national average and the average of charges of states in the Southern Regional Education Board (SREB) region. The mandatory charges for full-time undergraduate residents at the University of Maryland system were higher than the average charges in the SREB states, about equal to the national average, and lower than the charges at the research universities in the contiguous states. Between FY 1977 and FY 1987, tuition and mandatory charges have increased faster than inflation. Average room and board charges at Maryland public institutions in FY 1986 were approximately \$800

more than average room and board charges in the SREB or contiguous states, and have increased faster than inflation since FY 1979.

Since 1982, when the tuition guidelines were established by the State Board for Higher Education, progress has been made toward congruence with the tuition guidelines. Non-resident, full-time undergraduate students are charged more tuition than resident full-time undergraduate students. Graduate resident students are charged more than undergraduate residents; however, graduate non-residents pay less than undergraduate non-residents, making it cheaper for Virginians to attend graduate school in Maryland than in their home state. Part-time charges for undergraduate resident students are at least equivalent to full-time undergraduate resident student charges at all public campuses except St. Mary's, and part-time charges for law students are at least equivalent to full-time charges at the University of Baltimore and at the University of Maryland at Baltimore. Resident tuition at the community colleges continues to be less than tuition at the four-year colleges and universities, and only St. Mary's has failed to reach the SBHE goal of a lower tuition than the University of Maryland.

INTRODUCTION

The Maryland State Board for Higher Education (SBHE) was directed by the April, 1982 Report of the Joint Chairmen of the Senate Budget and Taxation Committee and the House Appropriations Committee to provide a report on tuition and fees. The report provided in response to the Joint Chairmen's request was presented to the Joint Chairmen and the Committees in June, 1982. A description of tuition policies in other states, information on Maryland practices, and interstate comparisons were included in the report.

The 1982 report indicated that 22 states had tuition policies that related tuition to the cost of education, to peer institutions or states, or to variables exogenous to higher education, such as the Consumer Price Index (CPI) or per capita income. In most states, tuition and mandatory charges were lowest at the community colleges and highest at the research universities. One-half of the states differentiated between undergraduate and graduate mandatory charges; all of the states had different mandatory charges for resident and non-resident undergraduate students. However, certain Maryland, Pennsylvania, and South Carolina schools charged resident and non-resident graduate students the same amount. Michigan and Florida set different tuition charges for upper and lower division undergraduate students.

The benchmark 1982 data indicated that tuition for undergraduate, resident, full-time students was about the same at the state colleges and at the University of Maryland. For

full-time undergraduate residents, Maryland's mandatory charges at the state universities and colleges and at the community colleges were greater than the national average and higher than the average charges in the SREB region. Those mandatory charges were also higher in the University of Maryland system than in the SREB states, about equal to the national average, and lower than charges at research universities in the contiguous states.

As a result of the 1982 study, tuition guidelines for the public four-year colleges and universities were developed and adopted by the State Board for Higher Education. A special provision allows individual campuses to deviate from those guidelines under special circumstances.

TUITION GUIDELINES

1. The State contribution for Instruction and Instruction-related costs as defined by the State Board for Higher Education guidelines should be no less than seventy percent.

2. Non-resident full-time undergraduate students should be charged more tuition than resident full-time undergraduate students.

3. Graduate students should be charged more than undergraduates.

4. Part-time charges for undergraduate resident students should be at least equivalent to full-time undergraduate resident student charges.

5. Tuition at the four-year public colleges and universities should be less than tuition at the University of Maryland. In those cases where this is not true currently, adjustments will be made over a period of at least five years.

6. Resident tuition at the community colleges should be less than tuition at the four year colleges and universities.

7. Tuition for medical, dental, and law school students should be more than tuition for other graduate students.

PURPOSE OF REPORT

The purposes of this report are to update the 1982 report on tuition and fees, to provide information on current tuition and mandatory charges at the institutions of higher education in Maryland, and to ensure that current practices conform with the Tuition Guidelines.

MARYLAND LAWS AND PRACTICE

Tuition and fee charges generally are established through the State budgeting process. It is not possible to separate tuition and fees from the funding process because most governing boards in Maryland and in other states historically have "backed into" tuition as the difference between the costs of educational services and available State revenues. To provide the difference between "costs" and "revenues," tuition and fees have increased dramatically in recent years as available state resources for higher education have shrunk, relative to the costs of education.

The University of Maryland Board of Regents, under Section 13-104 (b) of the State Code is charged with the responsibility to manage the University, and has been given all "the powers, rights, and privileges that go with that responsibility." Also, Section 13-105 (d)(2) gives the University the authority to "spend, or encumber, within the fiscal year in which they were received, revenues received in excess of those estimated for any fiscal year." Unexpended or unencumbered tuition and fee income "do not revert to the general fund of the State at the end of each fiscal year; and shall be available to the University for expenditure..."

The Morgan State University Board of Regents under Section 13-204 (f) has a more specific charge: "(f) Tuition and other fees. - The Board of Regents may: (1) fix tuition and other fees paid by resident and non-resident students; and (2) except for tuition, use the receipts of the fees for the purpose for which

they were collected without fiscal year limitation."

The Board of Trustees of the State Universities and Colleges, under Section 14-105 (d) (3) of the Annotated Code, has the responsibility to "Set tuition and fees." In Section 15-104 (b) of the Annotated Code, the Board of Trustees of St. Mary's College of Maryland has been given the responsibility for "the care, control, and management of the College and all of its property and assets; and may adopt any rules and regulations not inconsistent with law that it considers necessary for the government and management of the College."

For the community colleges, under Section 16-203 (j) of the Annotated Code, each community college board of trustees "may charge students reasonable tuition and fees set by it with a view to making college education available to all qualified individuals at low cost." Section 16-403 (e) specifies what minimum share of costs students should pay: " (1) Except as otherwise provided in this subsection, the students at each community college shall pay, through tuition and fees, at least 22 percent of current expenses. (2) The students shall pay, through tuition and fees, 17 percent of current expenses at Wor-Wic Tech Community College. (3) The students, through tuition and fees, shall pay 13 percent of current expenses at Cecil Community College, Garrett Community College, and Chesapeake College. (4) This subsection does not prohibit a county or regional board of trustees from requiring students at the community college to pay more than their share of the current expenses."

TUITION AND FEE CHARGES AT MARYLAND FOUR-YEAR
PUBLIC COLLEGES AND UNIVERSITIES

The public four-year colleges and universities in Maryland have many different tuition and fee charges. Full-time resident tuition is charged to undergraduates who are citizens of Maryland who carry a specified credit hour load each semester. The credit hour load varies from institution to institution, but is generally set at a minimum of 12 hours per semester for undergraduates. Non-resident tuition is charged to all students who do not qualify as residents of the State of Maryland.

For students who do not attend "full-time," tuition is based on a credit hour charge. All graduate students pay tuition based on credit hour charges. No flat rate has been established at the Maryland public four-year institutions for full-time graduate students. Tuitions at the professional schools vary by school.

In addition to tuition, fees generally are charged for Student Activities, Registration, Athletics, Health or Health Insurance, and Student Union Operations. For example, all undergraduates at the State colleges are required to pay a registration charge. Mandatory charges vary in amount and type from college to college.

The 1986-87 tuition and mandatory fees for the public four-year colleges and universities in Maryland are displayed in Table 1. Data for this table were obtained from each campus' budget submission for FY 1987 and were updated to reflect changes since the budget submission. Enrollment data from which weighted averages were calculated are given in Appendix A.

Tuition and fee charges for the public four-year colleges and universities are discussed in the following order: undergraduate charges, graduate charges, and professional charges.

UNDERGRADUATE CHARGES

Table 2 presents data on resident tuition for each college for the fiscal years 1977 to 1987. Over this time period the Consumer Price Index (CPI) increased at an average annual rate of 7.07 percent while the average tuition charge at Maryland four-year colleges and universities increased by 8.39 percent. Tuition charges at the University of Maryland increased at an average annual rate of 8.19 percent, over one percent greater than the average annual increase in the rate of inflation. At the state colleges and universities, tuition increased at the average annual rate of 8.06 percent. St. Mary's College tuition increased at a rate almost four percent per year faster than the increase in the CPI. For FY 1987, undergraduate resident tuition will vary from a low of \$1,166 at Morgan State University to a high of \$1,700 at St. Mary's College.

Table 3 presents information on undergraduate credit hour charges at the four-year public colleges and universities for resident and non-resident students. Undergraduate credit hour charges are the same for residents and non-residents at all Maryland four-year colleges and universities except Salisbury State College and Morgan State University. The average annual rate of change in credit hour charges between FY 1977 and FY 1987 exceeded the rate of inflation at the University of Maryland, Frostburg State College, and Morgan State University.

Resident Charges

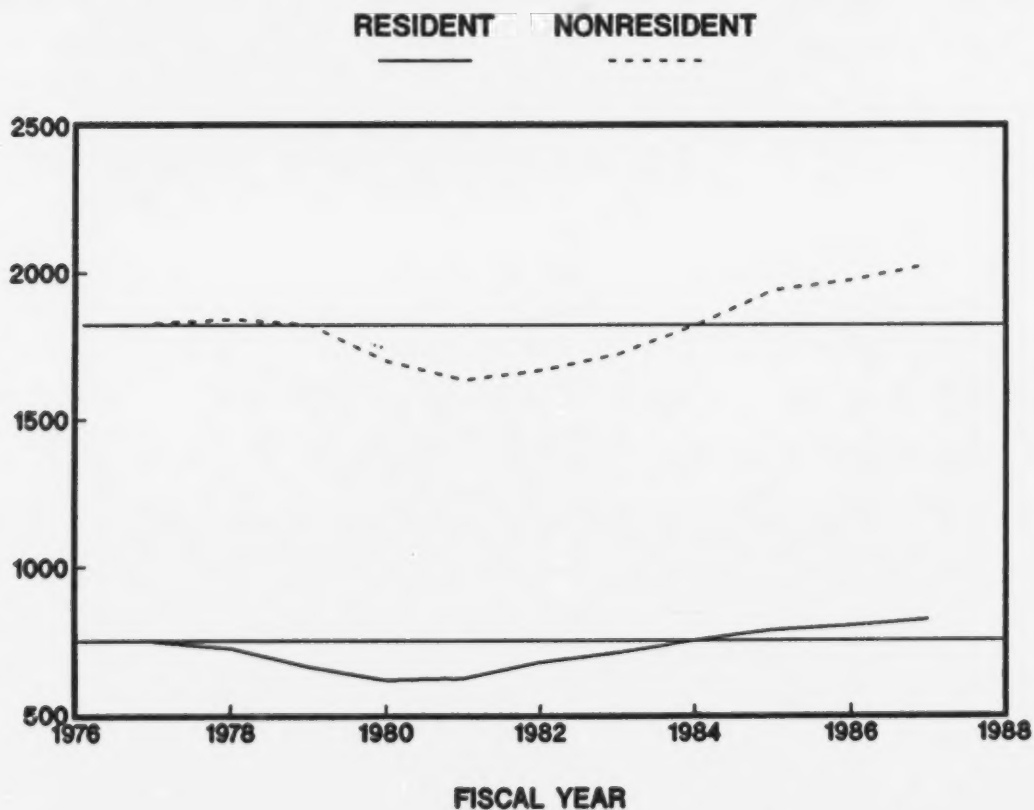

Table 4 shows full-time undergraduate resident tuition and mandatory charges for FY 1977 to FY 1987. Over the eleven years, average tuition and mandatory charges increased at an average annual rate of 7.61 percent at the University of Maryland, 8.67 percent at the State Universities and Colleges, 10.95 percent at St. Mary's College, and 7.81 percent at Morgan State University. Between 1977 and 1986, the national average increase for tuition and mandatory charges was 9.0 percent at universities and 8.79 percent at state colleges. For 1987, the lowest mandatory charges will be \$1,468 at the University of Maryland Eastern Shore and the highest will be \$2,050 at St. Mary's College.

Figure 1 shows the average undergraduate, full-time tuition and mandatory charges for residents and non-residents at the public four-year colleges and universities for FY 1977 to FY 1987, deflated by the CPI to FY 1977 dollars. Average resident charges, deflated by the CPI, were greater than FY 1977 charges in 1984 through 1987. For non-resident undergraduates, average charges in 1977 dollars were greater than FY 1977 charges in 1985, 1986, and 1987. This means that the real cost of college for resident and non-resident full-time undergraduates at public four-year institutions was lower in real dollars between 1978 and 1983 than it was in 1977.

Tables 5 and 6 present average undergraduate resident tuition and mandatory charges at universities and state colleges for the nation as a whole, in the SREB region, and in the states contiguous to Maryland. Nationally, average tuition and mandatory

FIGURE 1
RESIDENT AND NON-RESIDENT UNDERGRADUATE TUITION
AND MANDATORY CHARGES AT PUBLIC FOUR-YEAR INSTITUTIONS
1977-1987

(IN 1977 DOLLARS)

charges were 1.4 percent below the charges at the University of Maryland and the average of charges in the SREB region were 24.5 percent below the University of Maryland's. However, average charges for universities in the states contiguous to Maryland were 51.1 percent greater than the University of Maryland's charges. For resident undergraduate students attending Maryland's state colleges and universities, tuition and mandatory charges have exceeded the national average and the average of the charges in the SREB states by almost 30 percent. Tuition and mandatory charges at the state colleges were comparable to the average charges among the contiguous states.

Table 7 lists average room and board charges for Maryland public four-year colleges and universities for 1979 through 1987; Table 8 provides average tuition, mandatory charges, room, and board for each of the four-year colleges for 1979 to 1987. These are the amounts that an average, undergraduate, resident student living on campus would pay for a year of college. At some institutions, room and board charges increased at a rate significantly higher than inflation, due in large part to the building of new dormitory facilities.

Tables 9 and 10 provide these data for the states in the SREB region, and in the states contiguous to Maryland for public universities. Tables 11 and 12 provide similar data for public state colleges and universities. Students at Maryland public four year institutions of higher education who live on-campus paid room and board charges that were higher than similar students in the other SREB states. When room and board is added to tuition and mandatory charges (Tables 10 and 12), Maryland's college and

university students paid almost \$1,000 more in 1985-86 than the average student in other SREB states.

Non-resident Charges

Table 13 displays non-resident undergraduate charges at Maryland public colleges and universities for FY 1977 to FY 1987. Average mandatory non-resident charges at the public colleges increased faster than inflation in all segments of Maryland higher education during this period, but at a rate lower than the national average increase in tuition and fees. The University of Maryland's average non-resident undergraduate charges are higher than the SREB average, but significantly below the average charges in the contiguous states (Table 14). Maryland's state colleges and universities charge undergraduate non-resident students less than the average of the contiguous states, and in 1985-86, the same as the average of the SREB states (Table 15).

Relationship between Tuition and Mandatory Charges

Table 16 displays data on the relationships between mandatory fees and tuition at the four-year public colleges and universities. Each college sets different fees to support its student union and other auxiliary facilities. For example, mandatory charges represent 52.3 percent of tuition at Salisbury State College in FY 1987, while the University of Maryland Eastern Shore assesses fees equal to 16.3 percent of its tuition. The average was 24.3 percent for all public four-year institutions.

GRADUATE CHARGES

Resident Charges

Table 17 displays data on graduate resident charges for graduate students taking 12 credit hours per semester at the four-year colleges and universities for FY 1977 to FY 1987. During this time period, average mandatory charges increased from \$1,163 in FY 1977 to \$2,212 in FY 1987, an average annual percentage increase of 6.64 percent. Although this rate of increase was less than the national average rate, Maryland colleges and universities continued to charge resident graduate students more than the national average throughout the eleven year period. For FY 1987, the lowest graduate resident tuition (\$1,415) will be charged by Morgan State University, and the highest (\$2,406) will be charged by UMAB.

Credit hour charges for graduate residents and non-residents for 1977 to 1987 are shown in Tables 18 and 19. Bowie, Coppin, Frostburg, Towson, and the University of Baltimore charge the same amount per credit hour to resident and non-resident students. Resident and non-resident credit hour charges at Frostburg State College increased at the same rate as inflation (7.07 percent) over the eleven year period from 1977 to 1987; all other charges did not keep pace with inflation over the time period.

University of Maryland mandatory resident graduate charges exceeded the national average, charges in all other SREB states, and the average charges in the states contiguous to Maryland.

(See Table 20.) State college and university resident graduate charges were significantly greater than the SREB average and exceeded the national average and the average for the contiguous states. (See Table 21.)

Non-resident Charges

Graduate non-resident tuition and mandatory charges for FY 1977 to FY 1987 are displayed in Table 22. Graduate resident and non-resident tuition and mandatory charges were the same at Bowie State College, Coppin State College, Frostburg State College, Towson State University, and the University of Baltimore. The graduate non-resident tuition and mandatory charges averaged \$4,067 at the University of Maryland, \$2,092 at the State Universities and Colleges, and were \$1,655 at Morgan State in FY 1987. During the time period FY 1977 to FY 1987, in Maryland, graduate non-resident tuition and mandatory charges increased at a slower rate than inflation.

Tables 23 and 24 display information on graduate non-resident tuition and mandatory charges for SREB states and the contiguous states. These mandatory charges were lower in Maryland than the national average both for the University of Maryland and for the state colleges and universities, and increased at rates slower than the increase in the national average between FY 1979 and FY 1986. University of Maryland non-resident graduate tuition and mandatory charges were among the highest in the SREB states, but were well below the average charges in the contiguous states. State college and university charges were considerably below the average for the SREB states and the contiguous states. This

allows students from Virginia and Pennsylvania to attend graduate school as non-resident students in Maryland and pay nearly the same tuition as they would pay in their home states. Maryland residents do not have the same options in Virginia.

PROFESSIONAL SCHOOL TUITION AND MANDATORY CHARGES

Table 25 displays tuition and mandatory charges for law, medicine, and dentistry at the University of Maryland at Baltimore and for law at the University of Baltimore for FY 1977 to FY 1987. Over this time period, charges increased at rates almost double that of inflation. However, the relationships between resident and non-resident tuition and mandatory charges declined for law and medicine at the University of Maryland at Baltimore. In 1977 non-resident law students paid almost three times as much as resident students; in 1987, this relationship had declined to 1.84 times as much. For medical students, the change was more gradual, from 2.37 to 1.98 times as much.

Tables 26, 27, and 28 display data for the SREB states for resident and non-resident law, medical, and dental school tuition and required fees for 1983 and 1985. Numbers for Maryland vary somewhat because certain mandatory charges were omitted in the SREB data. Maryland charged the highest resident tuition and fees among the SREB states for all three professional schools during 1984-85. Maryland's resident charges exceeded non-resident charges in several states for the law schools. Maryland's non-resident professional school charges were among the highest in the SREB states, and exceeded the SREB average by several thousand dollars. The resident charges in Virginia for law, dentistry, and medicine are similar to those in Maryland.

COMPARISON OF TUITION AND FEE CHARGES AT MARYLAND'S
PRIVATE AND PUBLIC INSTITUTIONS

Table 29 displays average undergraduate tuition and mandatory charges at Maryland public and private four-year institutions of higher education for FY 1976 to FY 1986. During this time period, average charges at the private institutions increased at the average annual rate of 11.09 percent, compared with 8.43 percent for resident students and 8.99 percent for non-resident students at the four-year public institutions.

The average private college tuition and mandatory charges increased from \$2,462 in FY 1976 to \$7,045 in FY 1986; public college resident tuition and charges increased from \$675 to \$1,517, while non-resident tuition and charges increased from \$1,584 to \$3,746. Because the rate of increase was less for the public colleges than for private, the gap between private and public tuition widened from \$1,787 in 1976 to \$5,528 in 1986. The ratio of private to public tuition charges similarly increased from 3.66:1 to 4.64:1.

TUITION CHARGES AT THE COMMUNITY COLLEGES

The community colleges in Maryland charge different tuition for three types of students: in-county, out-of-county, and out-of-state. "Resident" or "in-county" students are those who reside in the county, or counties, served by the community college. "Out-of-county" or "out-of-district" students are those who reside in a county in Maryland that is not served by the community college. "Out-of-state" or "non-resident" students reside outside the state of Maryland. Under the Maryland statutes, a resident of the State of West Virginia who attends Garrett Community College in certain programs is considered an in-county resident for tuition purposes.

Tuition Charges

Tables 30, 31, and 32 contain full-time tuition charges for 1976 to 1986 for the community colleges for resident students, out-of-district students, and non-resident students, respectively. Tables 33, 34, and 35 display credit hour charges for 1976 to 1986 for the same three types of students.

By law, resident tuition is lower than out-of-district tuition, which is lower than out-of-state tuition. For FY 1986, resident tuition was approximately 50 percent, on the average, of out-of-district tuition; the difference between the two levels was established to represent the share of costs borne by county taxpayers to support their community college. Out-of-district tuition is less than non-resident tuition because the State does not contribute funds for non-resident tuition at community

colleges. In FY 1986, non-resident tuition was about three and one-half times resident tuition, and almost double out-of-district tuition.

In 1976, Allegany, Catonsville, Cecil, Dundalk, Essex, Frederick, Garrett, and Hagerstown all charged \$300, the lowest full-time resident tuition; Montgomery College charged the most, \$500. In 1986, Chesapeake charged the lowest full-time resident tuition, \$480, while Montgomery again charged the most, \$1,050. The gap between the highest and lowest charges has widened 14 percent from 60 percent to 46 percent in the past decade.

During the time period 1976 to 1986, increases in resident full-time tuition at Maryland community colleges and in the national average resident tuition have exceeded the annual rate of change in the CPI. Since 1976, the CPI has increased at an average annual rate of 7.25 percent, while Maryland resident community college tuition increased at an average annual rate of 8.10 percent. The national average resident community college tuition increased by 9.18 percent per year. Maryland community college tuition for full-time resident students exceeded the national average by over \$100. In fact, among Maryland community colleges in FY 1986, only Chesapeake College charged resident students less than the national average amount. The average charge for non-resident full-time students at Maryland community colleges was \$2,801, exceeding the national average (\$1,973) by over \$800.

Table 36 displays ratios between resident and non-resident tuition charges for full-time students. On the average, full-time non-resident students were charged 3.45 times as much

as Maryland residents in 1986, and 4.11 times as much in 1976. At the national level, non-residents paid 2.87 times as much as residents in 1986. These data, together with the data on full-time charges, suggest that Maryland community colleges charged non-resident students a greater share of costs than charged in other states.

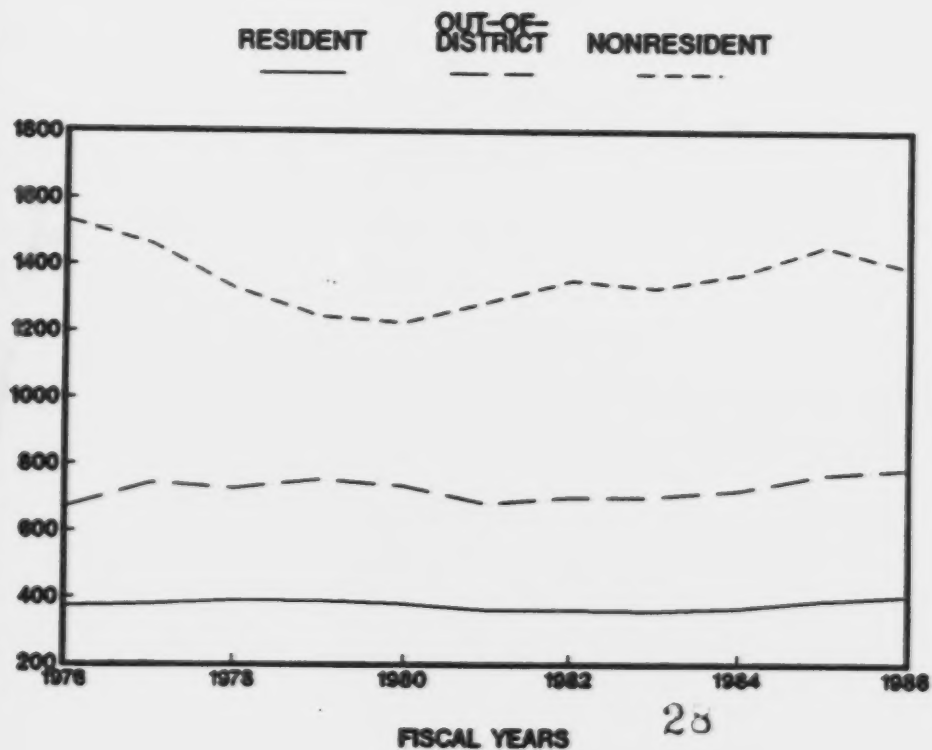

Tables 37 and 38 provide data on the average resident and non-resident tuition charges at community colleges in the states contiguous to Maryland and in the SREB states. Maryland resident students at community colleges have been charged the highest community college tuitions of any state in the SREB for the years 1976 to 1985, and were second only to Georgia in 1986. The average tuition for Maryland colleges has been about one and one-half times the average for the SREB states. Among the contiguous states, Maryland full-time resident community college charges have exceeded all except Pennsylvania.

Maryland non-resident community college charges were the highest in the SREB until 1982-83; only Virginia had a higher average charge during 1984, 1985, and 1986. Among the contiguous states, Pennsylvania and Virginia charged more for nonresident community college students. Maryland's non-resident community college charges did not increase at the same rate as the average SREB non-resident tuition, or as fast as the average tuition among the contiguous states.

Figure 2 displays average Maryland community college tuitions for resident, non-resident, and out-of-district students for 1976 to 1986. Tuition charges have been adjusted by the Consumer Price Index to 1976 dollars. These data show that, in terms of

FIGURE 2
COMMUNITY COLLEGE TUITION 1976 - 1986

(IN 1976 DOLLARS)

constant buying power of dollars, community college tuition was relatively more of a bargain for Maryland residents between 1981 and 1984. For non-residents, community colleges in Maryland have been "cheaper" since 1977.

Table 39 displays the relationship between average tuition at Maryland community colleges and average tuition at Maryland public four-year colleges and universities for the period 1977 to 1986. Over the ten years, there was very little change in the relationship between average four-year college and university tuitions and average community college tuitions. In 1977 average community college tuition was 68.7 percent of average four-year tuition; community college tuition as a percent of public four-year tuition peaked at 81.9 percent in FY 1980 and was 66 percent of average four-year tuition in FY 1986.

When compared to national average data, community colleges in Maryland charge tuitions that are relatively higher, compared to four-year tuition, than community college tuitions in other states. Community colleges in Maryland have higher tuitions relative to the four-year institutions than do community colleges in the SREB or in contiguous states.

EDUCATIONAL COSTS

Table 40 displays data on tuition and fees at the community colleges as a percentage of current general revenues. These percentages are of interest because statutes require that tuition and fee revenues contribute a minimum percentage of current revenues. For 1984-85, students at each community college except Cecil, Garrett, Wor-Wic Tech, and Chesapeake, were required to

pay at least 22 percent of current expenses. At Cecil, Garrett, and Chesapeake, this percentage was 13; at Wor-Wic Tech, it was 17 percent. The data show that all colleges provided the minimum amount through tuition and fee revenues.

ASSESSMENT OF TUITION GUIDELINES

Tuition guidelines were established by the State Board for Higher Education in 1982. An evaluation of progress toward the tuition guideline goals follows:

1. For the four-year public colleges, the State contribution for instruction and instruction-related costs as defined by the State Board for Higher Education budget guidelines should be no less than seventy percent.

The SBHE has redefined the budget guidelines since the tuition guidelines were established in 1982. Instead of six separate guidelines formerly used to calculate total state support for the four-year institutions, a single guideline was used for the FY 1987 budget submissions. If an institution receives 100 percent of the guideline level, then the institution will receive 70 percent State support. In FY 1987, by this formula, the State is providing 58.0 percent of expenditures for instruction and instruction-related activities. This compares to an average State support of 55.6 percent in FY 1985 and 57.0 percent in FY 1986.

2. Non-resident full time undergraduate students should be charged more tuition than resident full-time undergraduate students.

Table 1 shows that, for each four-year public college and university and for each community college, non-resident full-time undergraduate students are charged at least twice as much tuition as resident full-time undergraduate students.

3. Graduate students should be charged more than undergraduates.

Table 1 indicates that undergraduate resident students are charged less than graduate resident students. However, at all campuses, full-time graduate non-resident students are charged less than full-time undergraduate non-residents.

4. Part-time charges for undergraduate resident students should be at least equivalent to full-time undergraduate resident student charges.

For FY 1987, each of the four-year public colleges and universities, except St. Mary's College of Maryland, charge part-time undergraduate resident students at a rate that would be more than full-time undergraduate resident tuition, if the part-time student were taking 15 credit hours per semester. (See Tables 2 and 3.)

5. Tuition at the four-year public colleges and universities should be less than tuition at the University of Maryland. In those cases where this was not true in 1982, adjustments will be made over a period of at least five years. In FY 1982, the University of Maryland and the institutions under the Board of Trustees of the State Universities and Colleges all charged \$870 for undergraduate, full-time resident tuition, while St. Mary's College charged \$875 and Morgan State charged \$745. In 1983, only Morgan State University charged lower tuitions than the University of Maryland. However in 1987, only St. Mary's College is charging a higher tuition than the University of Maryland. (See Table 2.)

6. Resident tuition at the community colleges should be less than tuition at the four-year colleges and universities.

Tables 2 and 30 list resident tuition charges for the four-year colleges and universities and community colleges, respectively. Since 1976 resident tuition at the community colleges has been, on the average, at least \$100 less than resident tuition at the four-year colleges. In 1986, community college tuition was \$400 less than four-year college average tuition.

7. Tuition for medical, dental, and law school students should be more than tuition for other graduate students.

Table 1 lists FY 1987 tuition charges for medical, dental, law, and other graduate students. Resident graduate tuitions were at least \$1,000 less than professional school tuitions, and non-resident graduate tuition charges are at least \$2,000 below non-resident professional school tuition charges. An additional item which may be added to a revision of the tuition guidelines is the relationship between part-time and full-time charges for law school students.

For FY 1987, both the University of Maryland-Baltimore City and the University of Baltimore charge part-time resident and non-resident law students at a rate that would be more than full-time tuition if the part-time student were taking 15 credit hours per semester. (See Table 1 and 25.)
